Unit 1

Calculating Grades

1.1 Calculating the effect of a new grade on your existing average

Yo Mr. Vober! If I get a bad grade on this, will it bring down my grade?

Bruh, that's how math works.

If you get a grade on your test that's HIGHER than your current average, your grade goes UP ↑

If you get a grade on your test that's LOWER than your current average, your grade goes DOWN ↓

If it's worth a lot of points, it makes it go up or down by a lot more.
